

About Vinolok™

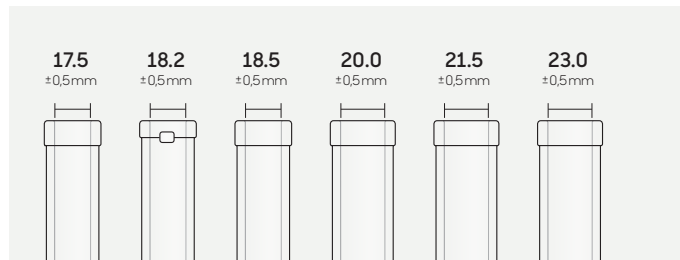

How it works

The Vinolok™ closure is part of a system consisting of a closure, bottle and capsule. The capsule (1) ensures the safety of the system during storage and transport. The glass closure (2) is made from high quality glass and is resistant against mechanical damage. The sealing ring (3) is made of EVA (Ethylene Vinyl Acetate Copolymer) by DOW and contains no phthalates or allergens. The closure can be inserted into the bottle (4) manually or by a semi or fully automatic bottling machines.

Vinolok™ sizes

The Vinolok™ closure is available in many sizes that match the inner diameter of the bottleneck of compatible bottles.

Compatible bottles

You can find a list of bottles compatible with the Vinolok™ closures online! Vinolok works with all major bottle producers to ensure the availability of a wide range of bottles that work with the glass closure. The total number of compatible bottles is over 800 and new bottles are updated regularly.

Why Vinolok™

Packaging is the primary contact a consumer has with your product and first impressions matter. The entire bottle and packaging must be eye-catching, attractive, and legible to grab the consumer's attention. In addition, environmentally friendly and expository elements have a positive impact on consumers. Ultimately, innovative packaging influences the consumer experience, which can have a significant effect on your business.

About glass

Glass is endlessly and fully recyclable without loss of quality, thus supporting the circular economy concept by reducing waste and keeping materials in use. The use of recycled glass can significantly reduce energy consumption compared to the production of new glass from raw materials, thus having a positive impact on carbon emissions. These properties make glass an ideal material for closures which are designed for closing and preserving wine and spirit bottles.

Classic Collection

The pure shape of this glass closure emphasizes the characteristics of the product. Vinolok™ Classic comes in three glass colours - clear, rosé and black, and several sizes. The Classic Collection can be enhanced by many design options and together with customisation will make your brand unforgettable.

Duet Collection

Vinolok™ Duet is an exquisite collection of bottle closures that seamlessly marries the elegance of glass with the rustic charm of wood. This innovative range boasts seven distinctive designs, each a masterpiece. Duet closures incorporate wood in two colour options: beige and dark brown.

Edge Collection

When you want to give your packaging an edge with a more prestigious shape. The Edge is a unique collection that, together with endless design possibilities, offers the right closure for an exclusive and exceptional design for your bottle.

Design options

Create a closure as unique as your brand with the Vinolok™ Design Options. Vinolok™ is the only closure that offers exceptional possibilities of customisation and makes your brand unforgettable.

Coloured sealing rings can be tinted to any colour. You can choose from a predefined set of available colours or choose your very own colour from the Pantone palette.

Vinolok™ Rosé with top printing is ideal for rosé wines.

Vinolok™ Black is great for dark bottles and with a contrasting sealing ring, it makes a lasting impact on customers.

The Duet collection offers top and side lasering which allows branding with intricate precision while creating a distinctive burn effect.

Metal stickers can be placed on top of the Vinolok™ closure to achieve a premium look.
